**Silkscreen** Printing is a stenciling method that involves printing ink through stencils that are supported by a porous fabric mesh stretched across a frame called a screen.

**Embroidery** is the handicraft of decorating fabric or other materials with needle and thread or yarn. Embroidery may also incorporate other materials such as, pearls, beads, quills, and sequins. Today, embroidery is most often seen on caps, hats, coats, blankets, dress shirts, denim, stockings, and golf shirts. Embroidery is available with a wide variety of thread or yarn color.

**Pad printing** is a printing method that allows the transfer of an image onto a 2D object. It's a commonly used decoration technique as it can be printed on all kinds of shapes and textures.

**Engraving** is the practice of incising a design onto a hard, usually flat surface. This method can be used on glass, metal & wood.

# PRINTING SERVICES

**Epoxy** resins are low molecular weight pre-polymers or higher molecular weight polymers which normally contain at least two epoxide groups. The epoxide group is also sometimes referred to as a glycidyl or oxirane group.

**Deboss** It is a process whereby heat & pressure is being applied. This method can be used on real / artificial leather products.

**Heat presses** are often used to apply designs to fabrics, specially designed presses can also be used to imprint designs on mugs, plates, jigsaw puzzles, caps, and other products.

**Roll printing** gives high quality, long-lasting result for single and multi-colour decoration on cylindrical surfaces. Inks are pressed through mesh stencils to produce clear, sharp images that are ideal for logos and text.
